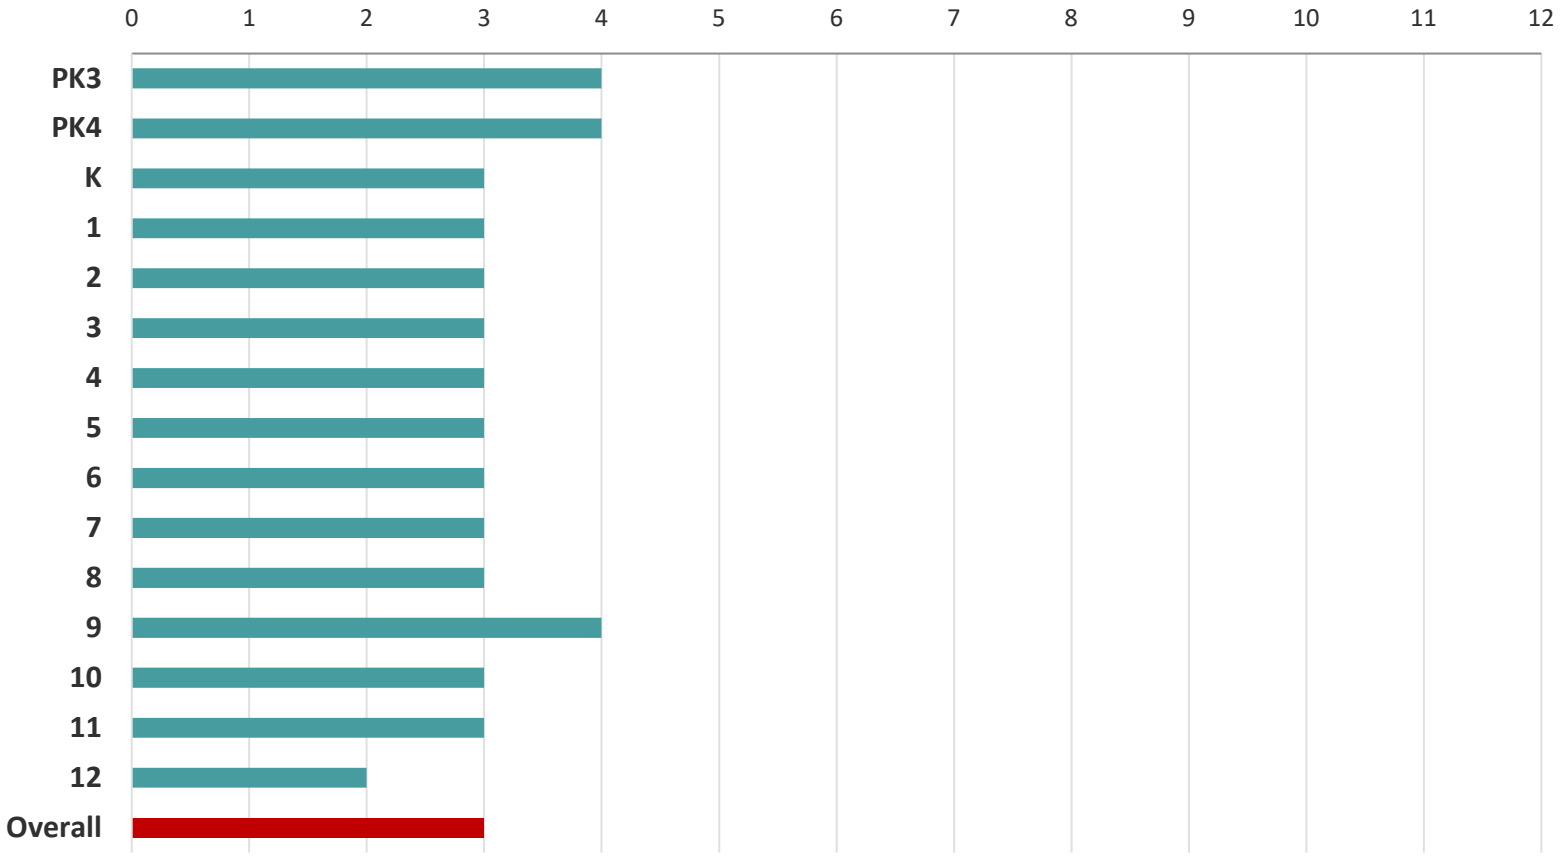
2025 Lottery– Median Number of School Selections



Applicants can select and rank up to 12 schools on each student's application. The median number of schools selected on each application varied by grade. For example, the median number of schools selected was four for PK3 applicants, while in K the median number of school selections was three.

Overall, in 2025 the median number of schools selected per application was three out of a possible total of 12 school choices.
